SUMMARY

Job-Onboard is a dynamic platform designed to simplify job management and enhance user interaction. Users can add, post, and edit jobs seamlessly. The platform features a grouping functionality, enabling users to create and manage groups effectively. A chatbot provides instant assistance, while the news section keeps users updated with industry trends. Profile rendering and editing are secured with robust user authentication and database security measures, ensuring data protection. This feature-rich application fosters a secure and interactive environment, making job management and professional networking efficient and user-friendly.
